

ROTATOR WITH A CHUTE

IMPROVE YOUR PRODUCTION WITH SMART ERGONOMIC SOLUTIONS

Avoid down-time and slow, manual processes in your production!

Production stops are expensive. Why risk them with unreliable and inefficient equipment that breaks or runs slowly?

The rotator is a flexible, power-driven solution for lifting, transporting and emptying boxes and crates.

It is a reliable and compact machine, very easy to operate. It comes with a remote control for lifting and rotation and has an ergonomic handle. All your workers can operate it with little introduction.

The chute, mounted to the boxholders, makes it easy and efficient to fully empty boxes without manual efforts.

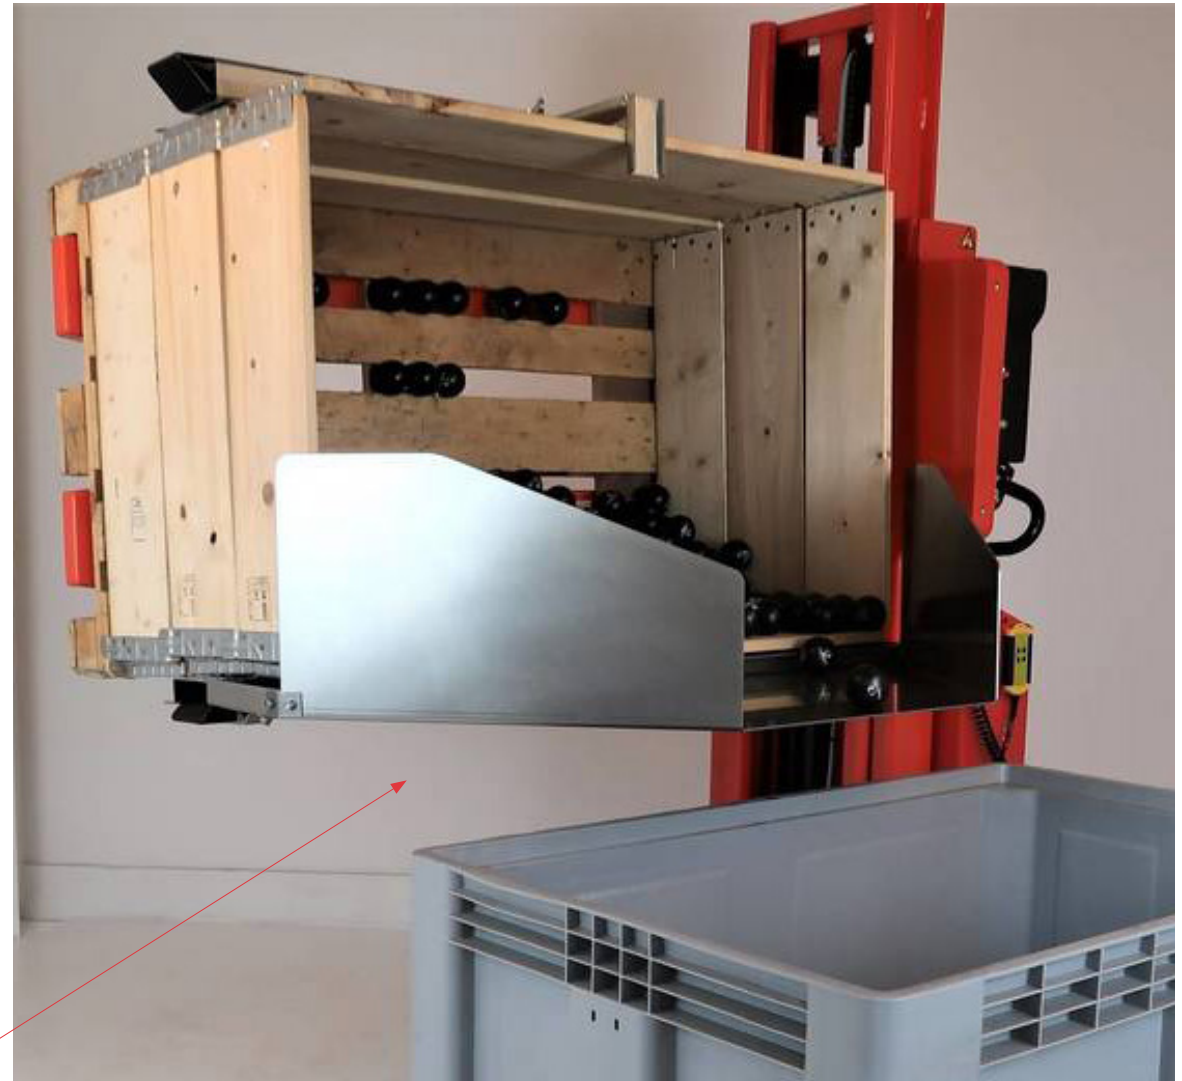

The rotator is constructed from high-quality steel, and is very robust with low maintenance costs.

Simply put - the perfect match if you want to increase productivity, avoid down-time and improve your automated work-flow.

Chute for careful and concise handling of small components

The rotator has two overall purposes:

- to fully empty boxes and crates with the chute, or
- to create ergonomically correct working positions by lifting and rotating boxes to a proper working height.

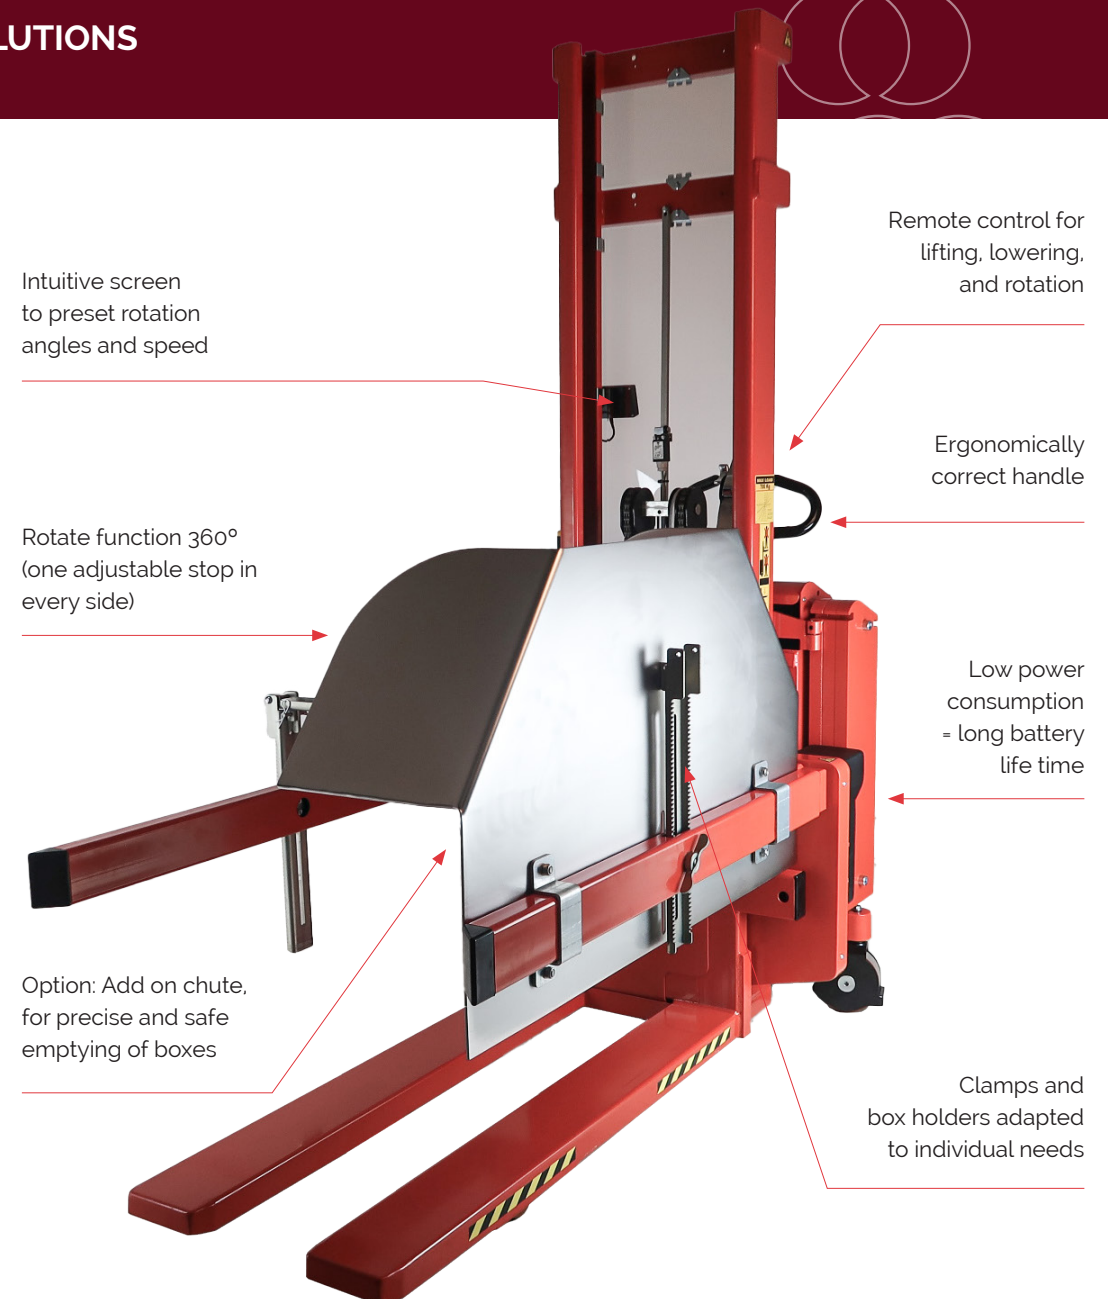

ROTATOR WITH A CHUTE

IMPROVE YOUR PRODUCTION WITH SMART ERGONOMIC SOLUTIONS

Features and benefits

- A very flexible solution for lifting, rotating and transporting boxes and crates.
- Optimise productivity and efficiency with power-driven rotation and all-in-one remote control.
- Compact design and high quality.
- Robust, reliable and easy to operate.
- High safety for your workers and components/items.
- Comes in fully or semi-powered versions.
- The rotator can lift 1.000 kg. Also when rotating beyond 90°. Clamps are necessary when rotating beyond 60°.

Remote control for lifting, lowering, and rotation

Ergonomically correct handle

Intuitive screen to preset rotation angles and speed

Rotate function 360° (one adjustable stop in every side)

Low power consumption = long battery life time

Option: Add on chute, for precise and safe emptying of boxes

Clamps and box holders adapted to individual needs
